

# ESTATE SALE for K7OH - L.A. "Pete" Pedersen Saturday - July 20<sup>th</sup>, 2019 9AM until 3PM

## NO EARLY BIRDS

Pete's family invites YOU, to attend a **1-Day Ham Radio Sale** to dispose of his Ham Radio Gear. The family needs the Ham community's help, to find new homes for Pete's Ham gear and large inventory of spare parts, tubes and amplifier building supplies...

A retired USN radioman, Pete also worked as a professional radio repairman and electronics builder. And during the past 50 years or more, Pete accumulated a large stockpile of parts, consisting of variacs, HV roller inductors, vacuum variables, HV capacitors, transformers, chassis, and every possible low voltage and small parts required by a Master Amplifier Builder. There is also a large selection of power tubes and receiving tubes, miscellaneous test gear, and of course a couple transceivers and radio station accessories too...

The equipment will be priced to sell, below swapmeet pricing and fair market values. The more you buy the better the pricing will be in your favor! All offers will be considered by the family, who will be onsite for this sale. Their goal and priority on this day, will be to get his gear into the hands of those Hams, whom will put it to good use, rather than sending it to recycle and landfill...

And with your purchases, the family has decided that a portion of this sale's proceeds, will be donated to Pete's favorite clubs, the Island County Amateur Radio Club and the Stanwood Camano Amateur Radio Club...

## **Some of the jewels in K7OH's sale are:**

1. K7OH nicknamed Brunhilda, a 2x 4-1000 rack mounted Linear HF amplifier. Quality parts, variac, turns counters, vacuum variables, Peter Dahl HV transformer and more, Pete recently detailed his actual parts cost at \$1500. Fully operational!
2. K7OH nicknamed Thor, a 1x 4-1000 rack mounted Linear HF amplifier. Quality parts, variac, turns counters, vacuum variables, Peter Dahl HV transformer and more, Pete recently detailed his actual parts cost at \$1400. Fully operational!
3. Rohn HDBX 48 self-supporting tower, Tailtwister rotor and controller, KLM KT-34 triband yagi, this antenna system also includes a very useful heavy duty custom-built fold over mounting base (only four of these custom bases were designed and built by N7DTF).
4. Yaesu FT-990 HF Transceiver, excellent working condition.
5. K7OH homebrewed 2KW antenna tuner.
6. Metered 50A Astron Power supply, a RS-35M too.
7. Large collection of receiving tubes.
8. Several project or amplifier builds, completed homebrewed pair of 813 tubes, 4-1000 RF Deck, Dentron MLA 2500 Russian ceramic tube conversion in progress, and a Heathkit HA-14 mobile amplifier.
9. Parts and Pieces Galore!
